With over 100 years of history, sustainability is core to how we deliver and grow our business.

We are responsible in the treatment of our employees, our environment and our local community to ensure that our business activities have a positive impact. Our family ethos, corporate image and commitments to the people and communities where we work are as important to us as the services and products we offer.

Our policy is based on the following principles:

- To minimise the impact and maximise the benefits that our work has on the environment, communities, and people around us.
- To integrate our CSR considerations into all our business decisions.
- To comply with, and exceed where practicable, all applicable legislation, regulations and codes of practice.
- To review and to continually strive to improve our CSR performance.

2. AREAS OF FOCUS

In developing our agenda and setting out our policy we aim to deliver gradual but continuous improvements in our performance every year. As a result, our approach continues to evolve as we learn lessons along the way. To help define our policy we have divided it into four key areas:

- People
- Business Operations
- Environment
- Community
